QUALITY, HEALTH, SAFETY & ENVIRONMENT POLICY

We, at ME, are committed to:

- Providing products and services with the highest quality.
- Working to continually improve system efficiency while minimizing risk and protecting the environment.
- Working and collaborating with our suppliers to ensure the high quality of all the products and services they provide us, as well as ensure timely environmental monitoring and safety measures for workers.
- Developing and disseminating the Policy, objectives and documented procedures of the System.
- Establishing mechanisms to ensure the environmental protection, so that the activities developed avoid pollution and minimize the environmental impact of activities related to our products and services.
- Protecting the life, physical integrity and health of our employees, inside and outside our facilities, on a daily basis.
- Encouraging participation, teamwork and communication, based on our culture of knowledge transmission throughout the organization.
- Complying with all the legal and normative requirements applicable to our activity as well as other requirements that we endorse.
- Assigning responsibilities and delegating the necessary authority and functions to ensure compliance with the established work.
- Performing a sterling work with no risk of non-compliance with requirements and full satisfaction of the customer.
- Ensuring, with regard to health and safety at work, the consultation and participation of employees, eliminating barriers that limit their participation.
- Providing all the necessary resources at the service of the organization for an adequate development of our activity based on the commitments assumed and fulfillment of the objectives.
